

ASTECC: Accident Source Term Evaluation Code

You are professionals, engineers and scientists from European countries involved in NPP safety analysis and related especially to severe accidents. ENSTTI, the professional training and tutoring institute which transfers the knowledge and the knowhow from the European Nuclear Safety Organizations organizes a 5-day training course.

The objective of the training is to provide a basic understanding of the ASTEC software capabilities and its application in reactor accident source term assessment and severe accident management.

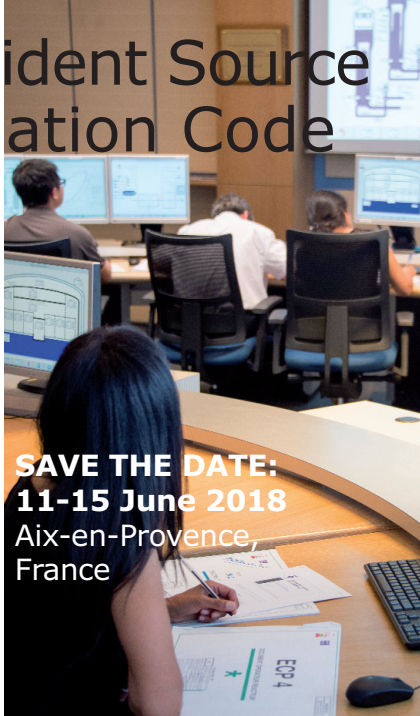

Price: €2500 per participant

Registration: as the course is designed for a maximum of 20 participants, please register without delay on the ENSTTI website: www.enstti.eu
Deadline: 11 May 2018

enstti

The ENSTTI management system is ISO 9001 certified and its Training Framework is ISO 29990 certified.
